WOMEN ENTREPRENEURS RECEIVE SUPPORT

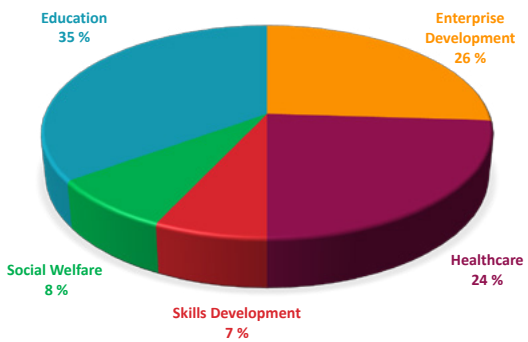

Our Enterprise Development Initiative's All Women-in-Business (AWIB) programme continues to empower local female entrepreneurs by supporting the launch of sustainable start-ups. Two of our beneficiaries, Juanita Modise of Juanita's Projects and Christolene Klein of Elegant Trading Enterprise, received capital goods to grow their businesses. Having completed both the compliance and assessment phases since joining in 2023, they qualified for grant funding support.

Designed to assist 50 women with essential business compliance tools, the initiative provides company registrations, tax clearance, CSD registration, BBBEE certification, bank accounts, and business plans.

These resources will help SMMEs expand capacity, increase revenue, and build sustainable futures.

ECONOMIC DEVELOPMENT SPEND - Q1: 2026

LEARNERS EMPOWERED WITH BACK-TO-SCHOOL SUPPORT

We are pleased to have supported young learners in Douglas, Northern Cape, with essential learning resources through the distribution of 1 500 brand-new school bags and, for the first time, educational storybooks across six local primary schools. This support is helping to enhance the learning experience while encouraging a culture of reading from an early age.

"Our school may be small in size, but it is big in heart, and we appreciate every distribution received." - Mr Roelf Alex Simon, Principal of Bucklands Primary School.

A local black woman-owned SMME was responsible for supplying the school bags and created temporary employment opportunities for three local youth, contributing to economic participation in the community.
