ECD PRACTITIONERS ADVANCE TO HIGHER QUALIFICATION

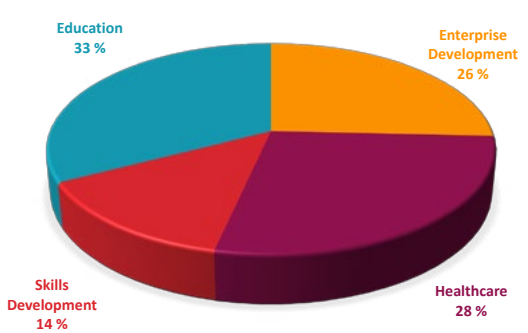

We are thrilled to share that fourteen ECD practitioners from the Siyancuma Local Municipality have completed their NQF Level 4 qualification and are now progressing to a Level 5 Higher Certificate, strengthening their skills to deliver better early learning and improve school readiness in their communities.

This forms part of our 18-month capacity-building programme, where these dedicated practitioners earned an accredited ECD certificate through ETDP SETA, growing their skills in teaching and caring for young children.

This milestone reflects a strong focus on building skills and supporting practitioners who play a key role in children's development. By strengthening their qualifications, the programme is improving teaching quality and supporting ECD centres in local communities.

STRENGTHENING COMMUNITY PARTNERSHIPS IN DOUGLAS

Our recent Stakeholder Engagement Forum AGM in Douglas was a wonderful reminder of what's possible when a community comes together with a shared purpose.

Community leaders, local businesses, educators, trust representatives, and municipal stakeholders all gathered to reflect on progress, talk honestly about challenges, and plan for what's next. The energy in the room was positive and forward-looking.

Conversations touched on education, skills development, entrepreneurship, agriculture, and healthcare, with a clear shared belief that lasting change happens when everyone has a seat at the table. We're proud of what we're building together in Siyancuma, and this forum showed just how far we've come.
