MATHS CAMP FOR GRADE 12 LEARNERS

In preparation for their final exams, the Matric Class of 2021 from Welsaam High and Bongani High schools participated in a three-day Math's Camp. The purpose of the programme was to empower and guide 224 Grade 12 learners to make better, informed educational and occupational decisions.

At the camp, learners developed skills in self-knowledge, educational and occupational exploration, and career planning. Learners were taught a variety of maths skills; how to improve their maths knowledge; and how to choose the right learning objectives.

As a result of the pandemic, Maths and Maths Lit suffered enormous setbacks. Learners who participated in this programme experienced a great deal of improvement in their final school exams.

Mr. Morolong, a teacher at Welsaam High had this to say: "The camp helped the learners with the final examination preparation. They worked through past Mathematics papers, which was productive and helped prepare them for their exams. We're hoping for good results when they come out."

SUPPORT FOR COMMUNITY SOUP KITCHEN

Boikanyo Solar donated a three-month grocery pack to Briepaal's Soup Kitchen, operated by the Non-Profit Organisation, I M Possible Dream Center.

Every day, five times a week, the kitchen provides a nutritious meal to the unemployed, migrant workers, women and men who are vulnerable, youth, children and street children, as well as people with disabilities.

This organisation strives toward eradicating poverty through helping the less fortunate members of the community. It is also an important entry point into the services available to individuals who are homeless or living in poverty.

HELP FOR SMALL BUSINESSES

15 SMMEs enrolled for the incubation, business training and mentorship programme, which forms part of our Enterprise Development flagship project. The main aim of this programme is to develop sustainable small businesses by uplifting rural and survivalist entrepreneurs, thereby stimulating local development.

The project helps small and micro business owners improve their business skills and promote economic development in their communities. Using the Growth Wheel Business Advisory tool, the training focused on maintaining profitable operations; understanding the importance of customer relations; establishing a strong organisation; as well as creating an attractive Business Concept.

The initiative created jobs by appointing three SMMEs to be service providers, each of which appointed ten members of the community.

BOOSTING HEALTHCARE AND SECURITY AT BREIPAAL CLINIC

We're proud to announce that Boikanyo Solar's Primary Health Care Programme launched in September 2021.

The first phase of the programme included infrastructure support at Breipaal Clinic, in the Breipaal community. A metal mesh fence and metal gates were installed, as a way to reduce security risks.

In line with a request from the Department of Health, the support came about after identifying break-ins and cable theft as major challenges confronting the hospital.

We are also pleased to share that phase two of the programme will include support of a hospital and two local clinics, through the provision of medical equipment. This support will aim to make primary health care services more accessible to the community surrounding the hospital and clinics.

This support is in line with our objective of contributing to medical equipment and infrastructure resources.

SIX STEPS TO WASHING YOUR HANDS

Use soap

Rub palm to palm with fingers

Rub tips of fingers

Rub each wrist

Rinse your hands

Dry your hands

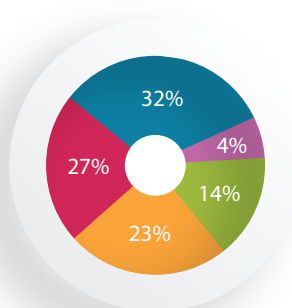

STAY SAFE
